

ANSI/ASME B16.5 Flanges & Grayloc Hubs

ANSI/ASME B16.5 flanges or Grayloc style hub adapters can be added to Norman Filter standard product lines. This allows for simple installation directly into piping runs and eliminates the need for complex fitting adapters. Flanges and Hubs are welded per ASME BPVC Section IX to NFC filter assemblies, ensuring product performance and safety.

NFC machines Grayloc style flanges in house to minimize welds and maintain housing integrity.

Commonly used in oil and gas and aerospace applications.

Custom Filter with Grayloc Hubs, Flanges, and Compression Fittings

NORMAN
FILTER COMPANY

Custom Filter w/ Grayloc Hubs for an 8,000 GPM Test Stand
