# Parker IntraFlow™ Modular Systems

## Introduction to Serious Simplicity

Parker IntraFlow™ substrate fittings have been developed specifically for analytical, lab and other complex general purpose instrumentation flow control systems. ISA/ANSI SP76.00.02 compliant, Parker IntraFlow™ fittings provide maximum flexibility with minimal space requirements. All flowpaths, regardless of direction, are maintained on a single plane within the system as there are no lower level manifold blocks required. Contiguous fitting flow paths are intra-connected with slip fit pressure connectors, while a threaded pegboard provides connection force and rigidity when fittings are mounted with cap screws. System assembly couldn't be simpler: a 5/32" hex head wrench is all you need to build with Parker IntraFlow™.

## Design Features

- System size is reduced as much as 75% compared with conventionally plumbed systems, drastically reducing panel space, internal volume and purge times
- Compliant with ISA/ANSI SP76.00.02 open architecture standards
- Complex system assembly was never easier! No tube benders or cutters required, and no welding. All that's needed to assemble is a 5/32" hex head wrench!
- Every component on your Parker IntraFlow™ system can be reused when upgrading with emerging NeSSI Generation 2 & 3 technologies
- All flow paths are on the same plane: Parker IntraFlow™ eliminates lower level manifolds to minimize system weight and leak potentials
- Whether mounting a fitting to the standard 1/8" pegboard or a valve to the fitting, the same 10-32 x 1/2" SHCS is the only screw required

## Specifications

- **Pressure Rating:**  
Vacuum to 500 psig (34 bar) CWP
- **Temperature Ratings:**
  - Fluorocarbon Rubber  
-15°F to 400°F (-26°C to 204°C)
  - Buna-N Rubber  
-30°F to 275°F (-34°C to 135°C)
  - Ethylene Propylene Rubber  
-70°F to 275°F (-57°C to 135°C)
  - Neoprene Rubber  
-45°F to 250°F (-43°C to 121°C)
  - Highly Fluorinated Fluorocarbon Rubber  
-25°F to 200°F (-32°C to 93°C)

Patent Pending

## Heated Systems

Conventionally fabricated heated systems typically utilize convection heaters inside an insulated enclosure. Parker IntraFlow™ systems deliver the heat through conduction directly where it's needed: within 5/32" of the actual fluid flowpath. Replacing the standard 1/8" thick pegboard with a 1/2" thick internally channeled plate, electric heat cartridges are easily inserted to heat fluid to desired temperatures. A steam heat ported pegboard is also available.

## Design Features

- Heated pegboard is interchangeable with non-heated pegboard and easily converted
- Heat is applied through conduction directly to the base of the fitting, increasing heat efficiency
- Commercially available standard general purpose heater cartridges insert and connect directly into the pegboard via 1/8" FNPT connections
- Class I, Division 2 compliant cartridges are available with direct connect conduit connections
- Parker Multitube® heat traced tube bundles are available for sample delivery to IntraFlow™ systems. Multi-zone controllers are capable of integrating all control at one source
- Steam heat channeled pegboards are also available

## Electric Specifications

- 120 or 240 VAC, 50/60 Hz
- 40, 50, 75 watt cartridges
- General purpose 1/4" nominal cartridge with 1/8" FNPT threaded connection

## Steam Specifications

- 1/8" FNPT supply and return connection ports
- 600 psig (41 bar) maximum steam pressure
- Maximum temperature capability determined by system o-ring selection

### **WARNING**

FAILURE, IMPROPER SELECTION OR IMPROPER USE OF THE PRODUCTS AND/OR SYSTEMS DESCRIBED HEREIN OR RELATED ITEMS CAN CAUSE DEATH, PERSONAL INJURY AND PROPERTY DAMAGE.

This document and other information from Parker Hannifin Corporation, its subsidiaries and authorized distributors provide product and/or system options for further investigation by users having technical expertise. It is important that you analyze all aspects of your application and review the information concerning the product or system in the current product catalog. Due to the variety of operating conditions and applications for these products or systems, the user, through its own analysis and testing, is solely responsible for making the final selection of the products and systems and assuring that all performance, safety and warning requirements of the application are met.

The products described herein, including without limitation, product features, specifications, designs, availability and pricing, are subject to change by Parker Hannifin Corporation and its subsidiaries at any time without notice.

### **Offer of Sale**

The items described in this document are hereby offered for sale by Parker Hannifin Corporation, its subsidiaries or its authorized distributors. This offer and its acceptance are governed by the provisions stated in the "Offer of Sale" located in Catalog 4110-U Needle Valves (U Series).

# Parker IntraFlow™ Fittings

All Parker IntraFlow™ fittings are permanently marked with the part number, flow schematic and material heat traceability code for easy identification during assembly and when servicing in the field. 1/8" diameter internal flow paths are precision machined at the intersections to minimize dead volume. Slip fit counterbores with a lead-in chamfer retain intra-connecting pressure connectors. Interface o-rings supplied separately on page 6.

## How To Order Parker IntraFlow™ Fittings

Example:

Product	Generic and Defined Flowpath	Material
IF-	T-A13B2-	SS
IF	From Chart	SS - 316 Stainless Steel

# Field Connectors

End Access

Top Access

Connecting Parker IntraFlow™ systems to pressure sources is simply accomplished with a field connector. Both top and end access connections are available in 1/8" FNPT, 1/4" SAE and 1/4" Inverted CPI™ & A-LOK®.

## How To Order Field Connectors

Example:

IF-	2F-	TOP-	SS
Product	Field Connection	Access	Material
IF	2F - 1/8" FNPT 4G5 - 1/4" SAE 4Z7 - 1/4" Inverted CPI™ 4A7 - 1/4" Inverted A-LOK®	TOP (access) END (access)	SS - 316 Stainless Steel

# Pressure Connectors

Slip-fit Pressure Connectors provide flowpath intra-connectivity between Parker IntraFlow™ fittings. Pressure Connectors are fully assembled with AS568B standard size 2-008 o-rings and are available in both standard and jumper lengths (for systems with flow requirements between non-contiguous fittings). Orifice is 1/8" and various elastomers are available.

## How To Order Pressure Connectors

Example:

IF-	CONNECTOR-	V-	SS	
Product	Component	Elastomer	Length	Material
IF	CONNECTOR	V - Fluorocarbon Rubber EPR - Ethylene Propylene Rubber BN - Buna-N Rubber NE - Neoprene Rubber KZ - Highly Fluorinated Fluorocarbon	Blank - Standard 1 - 1 Block Jumper	SS - 316 Stainless Steel

# Mounting Screws

Parker IntraFlow™ requires only a single size screw to assemble an entire system. 10-32 UNF x 1/2" SHCS kits are available in bag quantities of 100. Material is 18-8 Stainless Steel.

Part number: 10-32x1/2-SHC-SCREW-100.

## Interface O-Rings

AS568B standard 2-007 o-rings are placed in the counterbores of each Parker IntraFlow™ fitting, providing a seal with the mating surface mount component. Parker's inPHorm O-Ring Material Selection Software takes the guess work out of media compatibility with o-ring compounds. Elastomer compound recommendations are output from media descriptions (single & multiple components) and temperature inputs.

### How To Order Interface O-Rings

Example:

IF-	ORING-	V-	250
Product	Component	Elastomer	Bag Quantity
IF	ORING	V - Fluorocarbon Rubber	50
		EPR - Ethylene Propylene Rubber	100
		BN - Buna-N Rubber	250

		KZ - Highly Fluorinated Fluorocarbon Rubber	10
			25
			50
			100

## Pegboards & Brackets

A wide range of heated and non-heated pegboard sizes are available to build your Parker IntraFlow™ system. Odd shaped or overside pegboards can be created by overlapping IntraFlow™ fittings across 2 standard pegboards. Heated pegboards are machined from ASTM 6061 aluminum while non-heated pegboards are machined from ASTM 304 stainless steel. Stainless steel brackets (minimum of 4 recommended) bolted at pegboard corner locations elevate the system for mounting to a backplane. Heated pegboards have holes bored in the end of the plate for either electric heater cartridges, thermocouples or steam. In all cases, 1/8" FNPT threads provide the connection port.

### How To Order Pegboards

Example:

IF-	PEGBRD-	6x10-	ELEC
Product	Component	Size (hole matrix)	Style
IF	PEGBOARD	2x2	Blank - Non-Heated
		2x4	
		2x6	
		6x10	Blank - Non-Heated ELEC - Cartridge Heated STM - Steam Heated
		8x8	
		8x10	
		8x14	
10x10			
12x12			

#### Pegboard Mounting Bracket P/N's:

IF-MTGBRKT (non-heated pegboard)  
IF-MTGBRKT-HEAT (heated pegboard)  
(includes screws; 9/32" through hole for mounting to backplane).

# Adapters & Caps

Surface mount adapters to common fitting connections are available for makeup to pressure indicators, thermocouples, sensors and other commercially available devices. Adapters are available in both 1 (-1P) or 2 (-2P) flow path configurations as shown in the drawings. Any of the -2P adapters may be plugged to provide a flow-through cap over an IntraFlow™ fitting planned for a future system function.

## How To Order Adapters

Example:

IF-	2F-	2P-	SS
Product	Connection	Ports	Material
IF	2A - 1/8" Inverted A-LOK®	1P - Single Port 2P - Double Port	SS - 316 Stainless Steel
	2F - 1/8" FNPT		
	2Z - 1/8" Inverted CPI™		
	4A - 1/4" Inverted A-LOK®		
	4F - 1/4" FNPT		
	4V - 1/4" Male VacuSeal		
	4V1 - 1/4" Female VacuSeal		
4Z - 1/4" CPI™			

## Rotometer Adapters

SP76.00.02 specifications require a 1.53" centerline spacing between all substrate fittings. Parker Rotometer adapters have 1/4" tube stubs machined 0.045" offset of the SP76.00.02 footprint to accommodate 4-1/2" rotometer port centerlines.

## Functional Systems

### Basic Fast Loop System

Parker IntraFlow™ systems are easily standardized to provide common functionality for analyzer sample systems. Standardized functions simplify field maintenance for technicians with "plug & play" system changeout. Parker design engineers have developed numerous standardized systems that are available factory built and tested. Custom designs are also available as kitted components, or factory assembled and tested units. Consult with your local Authorized Parker Instrumentation Distributor or contact the factory for more details.
